### Once the trigger mode has been chosen, click on CONFIGURING BLUETOOTH

### Link a Bluetooth device

### **BEFORE YOU START**

Check that the Bluetooth device has already been paired with your iPhone. This information is available in the Bluetooth menu of the phone's settings.

Take a seat in your vehicle.

Switch on the ignition. The phone must be connected to the vehicle to make the association.

**BEGIN** 

### Make sure your phone is currently connected to your Bluetooth device, and then click **BEGIN**

### Link a Bluetooth device

Select a Bluetooth device to start the trip recording.

As soon as the phone connects to this device, the application starts analyzing your trip.

You can only select one device for this vehicle.

 $\checkmark$ 

T-COM

CONFIRM

### Select the Bluetooth device corresponding to your vehicle, click on CONFIRM

### Link a Bluetooth device

Congratulations!

The Bluetooth device **T-COM** is now linked to the vehicle **Hands-free kit** 

From now on, recording your trips will start automatically as soon as your phone connects to the Bluetooth device **T-COM**
